Assignment 1 (Web Designing Concept).

Q1 what do you mean by web Team? Explain how to create effective web team.

Ans when referring to the web team, this is the collection of workers who are brought together in order to create digital-based content. within that team there can be a number of roles. The number is varied and could actually change depending on the task given to the team.

The right team is the team that will fulfill your website objectives.

make sure that the following skills are covered while making right team :-

- 1) Project management skills.
- 2) Information design skills.
- 3) Graphic design skills.
- 4) Programming skills.
- 5) Technical/Network infrastructure skills.

Q27 What is communication breakdown? Explain various breakdown factors:

Ans A communication breakdown is defined as a failure to exchange information, resulting in a lack of communication between the web team.

Various Breakdown factors:-

- A member of team making a mistake due to miscommunication or not enough information.
- Two members of team doing the same task and not realizing it.
- A colleague not treating a client correctly.
- Certain vital tasks not being completed either on time or to the highest standard because no one in the team is giving updates to each other.
- An overworked manager sending an email missing vital information to their team because they've got a client on their case about completing work.

Q3) What do you mean by early planning? Explain in detail.

* Planning and process development :-

i) Early Planning :- In early planning first we have to know our audience for this.

we do :-

→ Interviewing :- A well planned interview with your client and team members is the best way to know your audience.

→ focusing on groups and market research.

→ gathering end user requirement.

Q) Defining Development Stages :-

→ project planning :- It is important to understand what will be the stages of development. It can be done through :-

i) ~~sta~~ Strategy.

ii) creative brief.

iii) Design Specification.

→ Project implementation :- It is the phase where vision & plans becomes reality. stages of project implementation are :-

i) production

ii) Test plan complete.

iii) Testing and launch.

→ Identifying the development phase:- It is necessary to know what your clients wants and what is possible to deliver on time. It can be done through:-

- i) writing the creative brief.
- ii) Brain Storming.
- iii) Creating the review site.

2) Creative and content planning:- Every website needs a concept to shape the way website will look like. for this we can do.

- a) Identifying the tech. infrastructure
- b) Defining technical development requirement.
- c) Feasibility studies and software testing.
- d) planning for maintenance and growth.
- e) Technical specification.

3) Production planning:- Production planning covers two areas first planning for initial production of site and second hand off to the client or another production team.

Q4 Explain team dynamics.

Ans) Every team member is made up of with different strengths, weaknesses and areas of expertise. Team dynamics come into play across daily interactions, shared work, and collaborative efforts of the team. If the team has positive dynamics, its members will work more effectively together, generate better, more innovative ideas and have higher chance of completing their goals.

Q5 Explain

a) Types of websites:- A group of world wide web pages usually containing hyperlinks to each other and made available online by an individual, company, educational institution, government or organisation.

The most common types of websites are:-

- 1) Blog.
- 2) Corporate
- 3) Ecommerce
- 4) Portfolio.
- 5) Social Media
- 6) TV or Video Streaming
- 7) Educational
- 8) Portal.
- 9) Wiki or community forum.

b) Website hosting:- We hosting is an online service that allows you to publish your website files onto the internet. So, any one who has access to the internet has access to your website..

c) Dynamic website:- A dynamic website is a website that displays different types of content every time a user views it. This display changes depending on a number of factors like viewer demographics, time of day, location, language settings, and so on.
